DETAILED ACTION

Sequence Rules

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures and CRF Problem Report.

Applicant is given ONE MONTH from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 76-77, 97-98, 107-108, 134-135, 142-145, 158, 161, drawn to a method for identifying a chemical compound which binds to a mammalian NPFF receptor, classified in class 435, subclass 7.2.

Art Unit: 1646

- II. Claims 178-180, 183-184, drawn to a process for preparing a pharmaceutical composition, as its reads on, for example, an antibody (see page 44, lines 27-31 of the Specification), classified in class 435, subclass 69.6.

The inventions are distinct, each from the other, for the following reasons:

Inventions I and II are independent and distinct, each from the other, because the structure of the compound produced by the process of Group II is independent of the means of identifying it, especially as the functional assay of Group I would reasonably be expected to identify numerous compounds having distinct structures and functions.
